

## *Campervans & Conversions*

- info@LomondCampers.co.uk - 01592 772651 - LomondCampers.co.uk -

**At Lomond Campers we manufacture Premium Campervans using industry leading materials and processes, often unrivalled by any other manufacturer!**

***Premium- Unwilling to compromise on quality, we only use the best quality materials and manufacturing processes.***

***Bespoke- You choose the finishes, making it your very own bespoke campervan!***

***Affordable- We can supply a used base van to build your conversion on, or you can supply your own base van- keeping costs low, yet quality high!***

## 1.0- The Base Van

We offer various ways we can build your very own campervan;

**1:- Brand new Renault Traffic campervan built to order.** We can supply a brand new, factory order campervan- finished in your very own bespoke conversion finishes and spec.

**2:-We can source a used base van** to suit you and carry out your campervan conversion. A campervan built to your specification! We agree on a budget and source a used base van to suit your specification and budget before carrying out your chosen campervan conversion- meaning you just need to collect your completed campervan! We offer this on vans of up to approx 6 yrs old/ 50k miles.

This way, just like buying one of our stock campervans, you can take advantage of our financing options.

**3:- Buy a base van for your campervan conversion.** We can advise you on where to buy a good base van to then supply us for your campervan conversion. Supplying your own base van gives you better control of the exact van you base your campervan on- including the make/ model/ age/ mileage/ colour/ spec and cost- add to that your very own spec conversion and you truly have your perfect campervan!

**4:- Supply your existing van** for a campervan conversion. If you have a suitable van, we can carry out one of our campervan conversions- you just need to choose all the finishes and spec to go in the conversion!

**We specialise in the VW Transporter, Renault Traffic and Ford Transit Custom as these make great campervans, so these are the vans we would recommend.**

## *2.0- Our Conversion (included in build-to-order campervans)*

Our conversions are carried out in-house using quality, modern materials and hardware.

We take pride in what we hand over to our customers and think campervans should be done to the best standard, not the cheapest.

Our cabinets are designed in-house before being manufactured from lightweight laminated plywood on our CNC router. We offer modern design while using only the best of finishing hardware- giving the furniture a modern, quality, yet practical design.

The option of a full bespoke campervan upholstery is always a talking point and is completed in our upholstery workshop to the highest of standards using the best quality automotive materials. Our Rock and Roll beds are M1 crash tested with seatbelts as well as a reclining function, and are one of the best & easiest operating beds on the market.

Power management is controlled by a top of the range Sargent unit with a modern control panel and combined 240v/12v systems, there's recessed LED lighting, USB and 240v power points too.

The premium conversion and materials reflect in the overall appearance, operation, reliability and also the resale value of your camper when the time comes, but more importantly it makes for a campervan that both you the customer and us at Lomond Campers can be proud of!

### **The Lomond Adventurer Conversion**

Our conversion is 4 berths with an elevating roof and bed kit which raise and lower in a matter of seconds- giving you plenty of headroom by day and a large upstairs bed by night.

The conversion is a high specification with options often left out by other converters.

- Elevating roof (Pop Top) with elevating bed for plenty of headroom & a large bed
- High specification CNC manufactured cabinets with overhead shelves, drawer, cupboards & tambour door. Completely constructed using recessed fixings with coloured finishing caps

Specification and pricing subject to change- please contact us for the latest pricing

Conversion turnaround time is 4 weeks from the build slot commencement (Trafic/Vivaro/T6/ Custom).

#### Finance

Financing is available, please contact us for further info.

## 5.0- Keen to go ahead? Our Process & What to Expect

### Initial visit

- Organise a day and time to visit us for a chat and to have a look at a completed campervan. You can have a tour around the workshop and any mid-conversion campervans if you like. We will then go through our conversion standard specification, options, cost and what makes us better than the others before discussing your own campervan requirements and budget (if we are supplying the base van).

- If you are keen to go ahead, we then discuss your base vehicle requirements (make, model, age, mileage, spec, colours etc) (if we are supplying base van) and build slot .

- We will send you a quote with the agreed details before taking a deposit to secure the booking and build slot.

### Second visit

- Once we have confirmed your build slot and received your deposit, you can then arrange to re-visit (or do on the same day if preferred) to spend time looking through our samples and pictures of previous conversions whilst completing your conversion order form- of which your campervan will be built from!

### Build spec confirmation

- We send your completed order form to you via email and give you a few days to confirm it.

### Build preparation

- We source and prep your suitable base van (if we are supplying) and have all of your chosen materials stocked ready for your build slot. 31 days prior to build we take your 50% payment.

### Your campervan build

- Your campervan build begins, crafted and built off of your order form in your chosen finishes and spec. Your campervan build is completed no later than your completion date. We will take your remaining 50% payment 7 days prior to completion.

### Build Completion

- Your newly built campervan is complete, fully tested, undergoes a habitation check and road test before being signed off and fully valeted ready for hand-over.

### Collection

- We contact you to let you know your campervan is ready for collection, send you our demonstration video (find us on [YouTube](#)) and organise a collection time.

- On your collection day we will let you look around your new campervan and you can ask any questions you may have. We then give you your document pack including our laminated user guide, before handing over the keys to your very own, newly built campervan!

## 6.0- Information for New Owners

### Join our Owners Club

We have an Owners Club group on Facebook where some of our owners share experiences, advice and pictures.

It is a closed community only for Lomond Campers owners and can be found on Facebook by searching 'Lomond Campers Owners Club' or by hovering your smartphone camera over our QR code;

[Join our Owners Club](#)

### Insurance

For insuring your newly converted campervan there are numerous companies who can offer this but we suggest a couple of insurance companies who specialise in campervans. If applicable they can also insure your base van prior to conversion and then adjust the insurance to suit once it has been converted into a campervan;

- Just Kampers Insurance (JustKampersInsurance.com/ 01256 976253)
- A-Plan Insurance (aplan.co.uk/ 01527 881010)

### Accessories

Before first time use of your camper you may want/ need some basic accessories and we offer these as a starter kit under 'optional extras' if you don't already have them.

### Gas

You will need a bottle of Campingaz 907 gas (Try to find a local supplier so future refills are easier). We are currently unable to supply gas.

### Porta Potti

For Conversions with porta potti storage, you will need the Thetford 335 Porta potti.
